

Appendix 2 Declaration from the manufacturer of the raw material / ingredient

To be used in conjunction with an application for a licence for the Nordic Swan Ecolabelling of cosmetic products.

This declaration is based on the knowledge we have at the time of the application, based on tests and/or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Swan Ecolabelling.

Trade name of the raw material / ingredient:

Ingoing substances in the raw material / ingredient (chemical name, INCI name if one exists, CAS number, amount in weight-%):

If a raw material / ingredient consists of more than one ingoing substance can specifications or technical data sheet be attached.

Function of the raw material / ingredient:

Other substances* in the raw material / ingredient and amount in weight-%:

* Other substances mean the following in this case (Se also Nordic Ecolabelling's definition of ingoing substances on page7 in the criteria document):

- Additives regardless of the concentration (e.g. preservatives and stabilisers)
- Substances known to be released from ingoing substances regardless of the concentrations (e.g. formaldehyde, arylamine, in situ-generated preservatives)
- Impurities in a concentration > 1,0 % (Note that there might be lower limits on part 1 of this appendix))

Examples of impurities are residues of the following: residues or reagents incl. residues of monomers, catalysts, by-products, scavengers, and detergents for production equipment and carry-over from other or previous production lines.

Please note, the information in this declaration is internally shared with certification personnel in Nordic Ecolabelling to be used in evaluation of applications of chemical technical products.
