

## Appendix 4 Declaration from packaging manufacturer (O13-O15)

To be used in conjunction with an application for a licence for the Nordic Swan Ecolabel of Greaseproof paper. You may also enclose other documentation such as technical data sheets.

This declaration is based on the knowledge we have at the time of the application, based on tests and/or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling.

Manufacturer/distributor
Packaging material (type of paper, board, plastic etc.) List all materials included in the packaging.

### General requirements (O14-O15)

O14 Recyclability packaging material in the sales packaging	Yes	No
<p>Is the main material* in the packaging recyclable** via the existing recycling systems?</p> <p><i>* The main material is defined as the material that makes up 90 wt% or more of the total packaging.</i></p> <p><i>* Incineration for energy recovery is not classed as material recycling.</i></p> <p><i>Biodegradable/compostable/oxo-degradable plastics cannot be recycled at today's recycling facilities.</i></p> <p>Describe the main material in the packaging and how it can be recycled.</p> <p>_____</p> <p>_____</p> <p>_____</p>	<input type="checkbox"/>	<input type="checkbox"/>

O15 Chlorinated plastic	Yes	No
Is chlorinated plastic e.g. polyvinyl chloride (PVC) and polyvinylidene chloride (PVDC) used in the packaging?	<input type="checkbox"/>	<input type="checkbox"/>

## Requirements for plastics packaging (O13):

O13: Recycled raw material in sales packaging - plastic	Yes	No
<p>Does the packaging contain recycled plastics*?</p> <p><i>*Recycled material defined according to ISO 14021 in the following two categories:</i></p> <p><i>Pre-consumer recycled material: Material (e.g. rework, regrind or scrap) diverted from the waste stream during a manufacturing process, requires a reprocessing (e.g. sorting, reclamation and granulation) before it can be reused regardless of whether it is produced in-house or externally. Excluded is reuse of materials such as rework, regrind or scrap generated in a process which is capable of being reused within the same process that generated it.</i></p> <p><i>Post-consumer material: Material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.</i></p> <p><b>If yes</b>, state the percentage of recycled plastics (weight- %): _____</p>	<input type="checkbox"/>	<input type="checkbox"/>
<p>Is the plastic packaging made of mono-material**?</p> <p><i>**A mono-material is defined as material components that are not composed of multiple material types, e.g. the same plastic type and cardboard are monomaterials.</i></p>	<input type="checkbox"/>	<input type="checkbox"/>

## Requirements for paper packaging (O13):

Paper packaging refers to all paper-based packaging (paper, board etc.).

O13: Raw material in sales packaging - Paper	Yes	No
<p>Does the paper packaging contain recycled material*?</p> <p><i>* Recycled material defined according to ISO 14021 in the following two categories:</i></p> <p><i>Pre-consumer material: Material diverted from the waste stream during a manufacturing process. Excluded is reuse of materials such as broke generated in a process and capable of being reused within the same process that generated it.</i></p> <p><i>Post-consumer material: Material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.</i></p> <p><b>If yes</b>, state the percentage of recycled material in packaging (weight- %): _____</p>	<input type="checkbox"/>	<input type="checkbox"/>
<p>Does the paper packaging contain certified fibres that originates from forestry certified under the FSC or PEFC schemes?</p> <p><b>If yes</b>, state the percentage by weight of the pulp/paper that originates from forestry certified under the FSC or PEFC schemes: _____</p>	<input type="checkbox"/>	<input type="checkbox"/>
<p>With reference to the percentage recycled material/certified fibres in the paper: Is the remaining proportion of fibre raw material covered by the FSC/PEFC control schemes (FSC controlled wood/PEFC controlled sources)?</p>	<input type="checkbox"/>	<input type="checkbox"/>
