

Appendix 4 Packaging (O4)

Name of the manufacturer of the battery or brand owner:	
Name/type of non-rechargeable portable battery/-batteries:	

Definitions:

Primary packaging: refers to the purchase packaging for the consumer, e.g. the packaging that holds four batteries, and which the consumer encounters in sales.

Secondary packaging: refers to the transport packaging and protects the packs of batteries during transport to stores and consumers.

Post-consumer material is defined in accordance with ISO 14021: "Post-consumer/commercial" is defined as material created by households or commercial, industrial or institutional facilities in the role of end users of a product, which can no longer be used for the intended purpose. This includes return of material from the distribution chain.

Description of materials used in the primary and secondary product packaging:

I hereby declare that:

- the total proportion of pre- and post-consumer recycled material in the primary packaging for the batteries is at least 80% by weight.
- chlorine-based plastic is not used in the primary and secondary product packaging.
- the primary packaging is designed in such a way that dismantling is possible for all individual parts for waste sorting (e.g. cardboard, paper, plastic, metal) without using any tools.

Small antitheft RFID components are excluded from the dismantling requirement.

Battery manufacturer's or brand owner's signature:

Place and date	Company name
