

## Appendix 9 Declaration from fragrance manufacturer/supplier

This declaration is to be completed by the manufacturer/supplier of any fragrance that is contained in Nordic Swan Ecolabelled car or boat care products under the criteria for transport wash installations, generation 3.

The declarations are given in good faith and according to the knowledge possessed at this time. Reservations are made for developments and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling.

This declaration states whether any of the substances below are constituent substances of the ingredients, either as an impurity or not, and irrespective of the quantity. This is also to be explained on page 2 of the declaration.

*The following definition of "constituent substance" applies: unless otherwise stated, the constituent substances are all substances in the product, including additives (i.e. preservatives or stabilisers) in the ingredients, but not impurities from the ingredient production. Impurities are defined as residual products from the ingredient production that can be found in the final product in concentrations below 100 ppm (0.01% by weight, 100 mg/kg), but not substances added to an ingredient or product deliberately and with a purpose, regardless of amount. Substances/products known to be liberated by a constituent substance are also themselves considered to be constituent substances.*

*Note that the fragrance manufacturer/supplier must also make a declaration in relation to the requirements set out in Appendix 8.*
