Conditions for declaration

The following definition must be used for "ingoin": Unless otherwise stated, ingoin substance covers all substances in the product, including additives to the raw materials (e.g., preservatives or stabiliser), but not impurities from production, incl. raw material production. Impurities are taken to be residues from production, incl. raw material production included in the product in concentrations of less than 100 ppm (0.0100% by weight, 100 mg/kg), but not substances added to a raw material or product deliberately and for a purpose, regardless of the quantity. Impurities must also be stated in the declaration. Known cleavage products of ingoin substances are also considered to be constituents.

This appendix is completed and signed by the chemical supplier based to the best of his/her knowledge at the time of the application, also based on information from raw material manufacturers, recipe, and available knowledge on the chemical product with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling. If the information concerning the composition of the raw materials is confidential, the information can be sent directly to the environmental labelling organisation.
