

Appendix 16 Adhesives in wood based panels

Completed by the manufacturer/supplier of the adhesive

Manufacturer/supplier of the adhesive:
Tradename of the adhesive/adhesive system:

Framework of the declaration

Ingoing substances: All substances regardless of concentration in a used chemical (eg pigment or bleach) or chemical mixture (eg glue or surface treatment), including additives (such as preservatives and stabilisers) from the raw materials. Substances known to be released from ingoing substances (such as formaldehyde, arylamine and in-situ generated preservatives) are also regarded as ingoing substances.

Impurities: Residuals, pollutants, contaminants et from production, including raw materials production, that remain in a chemical or in the chemical product in concentrations ≤ 100.0 ppm (≤ 0.01000 wt%, ≤ 100.0 mg/kg).

Impurities in the raw materials exceeding concentrations of 1.0% are always regarded as ingoing substance, regardless of the concentration in the chemical product. Examples of contaminants are residues of the following: reagents including monomers, catalysts, byproducts, "scavengers" (i.e. chemicals used to eliminate/minimise adverse substances), cleaning agents for production equipment, and "carry-over" from other/earlier production lines.

This declaration is based on the knowledge we have at the time of the application, based on tests and/or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Swan Ecolabelling.

If some of the information in this declaration is confidential, the information may be sent directly to the Nordic Swan Ecolabelling.

Requirement 054: Adhesive in the panel (includes the adhesive system in the panel)	Yes	No
Does the content of the compound (CMIT/MIT) 5-chloro-2-methyl-2H-isothiazol-3-one (CAS no.: 26172-55-4) and 2-methyl-2H-isothiazol-3-one (CAS no.: 2682-20-4) (3:1) in the adhesive exceed 15 ppm (0.0015 wt%, 15 mg/kg)?		
Does the total content of all isothiazolinone compounds in the adhesive exceed 500 ppm (0,0500 wt%, 500 mg/kg)?		
Does the content of 2-Methyl-3(2H) -isotiazolinone in the adhesive exceed 200 ppm (0,0200 wt%, 200 mg/kg)?		

In case of changes in the composition of products, a new Appendix with fulfillment of requirements must be submitted to Nordic Swan Ecolabelling.
