

Appendix 3 Wood material in pulp

To be used in conjunction with an application for a licence for the Nordic Swan Ecolabelling of Packaging for Liquid Foods.

Declaration for requirement O11 is completed by the pulp producer.

Pulp producer	Pulp name:
---------------	------------

Wood species used

State the name (wood variety/species name) of the wood raw materials used in pulp:

Restricted wood varieties

Are tree species listed in the list of restricted tree species* used in the pulp? ☐ Yes ☐ No

* The list of restricted tree species is located on the website:
<http://www.nordicecolabel.org/certification/paper-pulp-printing/pulp--paper-producers/forestryrequirements-2020/>

The list consists of tree species listed on:

- CITES (Appendices I, II and III)
- IUCN red list, categorized as CR, EN and VU
- Rainforest Foundation Norway's tree list
- Siberian larch (originated in forests outside the EU)

Exemptions

Eucalyptus and Acacia used for pulp and paper production is exempted from the list. Regarding pulp, fibre raw material from eucalyptus/acacia must be a minimum of 70% certified.

Tree species listed on either b), c) or d) may be used if it meets all of the following requirements:

- the tree species does not originate from an area/region where it is IUCN red listed, categorized as CR, EN or VU.
- the tree species does not originate from Intact Forest Landscape (IFL), defined in 2002
<http://www.intactforests.org/world.map.html>.
- the tree species shall originate from FSC or PEFC certified forest/plantation and shall be covered by a valid FSC/PEFC chain of custody certificates documented/controlled as FSC or PEFC 100% through the FSC transfer method or PEFC physical

separation method. Tree species grown in plantation shall in addition originate from FSC or PEFC certified forest/plantation, established before 1994.

Nordic Ecolabelling may request further information if there is any doubt concerning specific wood varieties.

If tree species exempted on the list of restricted tree species are used:

Eucalyptus/acacia pulps

Regarding eucalyptus/acacia pulps, state the share of certified fibre raw material in the pulp:

If species from the lists b), c) or d) is used:

Please send in the following documentation for the tree species used:

- ☒ A valid FSC/PEFC Chain of Custody certificate from the supplier or manufacturer of the Nordic Swan Ecolabelled product of the wood that covers the specific tree species and demonstrate that the tree is controlled as FSC or PEFC 100% through the FSC transfer method or PEFC physical separation method.
- ☒ The applicant/manufacturer/supplier are required to document full traceability back to the forest/certified forest unit thereby demonstrating that;
 - the tree does not originate from an area/region where it is IUCN red listed, categorized as CR, EN or VU;
 - the tree species does not originate from Intact Forest Landscape (IFL), defined in 2002 <http://www.intactforests.org/world.webmap.html>;
 - For plantations the applicant/manufacturer/supplier are required to document that the tree species does not originate from FSC or PEFC certified plantations established after 1994
