

## Appendix 9 Declaration of VOC content of adhesive or product for surface treatment

The chemical product's name and area of use:
Producer/supplier of the chemical product:

### Conditions for declaration

*The following definition must be used for "ingoing": Unless otherwise stated, ingoing substance covers all substances in the product, including additives to the raw materials (e.g., preservatives or stabiliser), but not impurities from production, incl. raw material production. Impurities are taken to be residues from production incl. raw material production included in the end product in concentrations of less than 100 ppm (0.0100% by weight, 100 mg/kg), but not substances added to a raw material or product deliberately and for a purpose, regardless of the quantity. Impurities must also be stated in the declaration. Known cleavage products of ingoing substances are also considered to be constituents.*

*This appendix is completed and signed by the chemical supplier based to the best of his/her knowledge at the time of the application, also based on information from raw material manufacturers, recipe, and available knowledge on the chemical product with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling. If the information concerning the composition of the raw materials is confidential, the information can be sent directly to the environmental labelling organisation.*

Does the product contain volatile organic compounds<sup>1</sup>? Yes ☐ No ☐

If yes, state which substances and the amount (% by weight):

---

Does the product contain volatile aromatic compounds (VAH)<sup>2</sup>? Yes ☐ No ☐

If yes, state which substances and the amount (% by weight):

---

Signature of producer of the chemical product:

Date:	Company name:
Person responsible:	Telephone: Email:

---

<sup>1</sup> Volatile organic compound is here defined as: Organic compounds with a steam pressure exceeding 0.01kPa, at 20°C. For products under EU Directive (2004/42/EC) in which steam pressure is not indicated:

Organic substances with an initial boiling point that is lower than or equal to 250°C measured at a normal pressure of 101.3 kPa.

<sup>2</sup> Volatile aromatic compounds are volatile organic compounds in which one or several benzene rings are included in the molecule.
